Labels

It's a BIG Deal.

OPIOID CRISIS

What is a Controlled Substance Safety Label?

A Controlled Substance Safety Label (CSSL) is an auxiliary label used to distinguish controlled substances from other drugs, and to provide a quick, visual reference of instructions and warnings. Scanning the QR code opens a short and easy-to-understand safety video.

- **Reinforce Patient Safety**
- **Large Print, Booklet-Style Labels Ensure Readability**
- **Safety Videos Linked Via QR Code**

CSSLs are part of ScriptView, one of the solutions offered in the ScriptAbility prescription labeling system.
