En Vision America, Inc.
1845 W. Hovey Ave.
Normal, IL 61761

Hi Dave:

It was a pleasure to speak with you during my "panic" time when ScripTalk was not talking. I also, placed a talk/message with VIST VA... after the unit did a "wake up" also recalled the help calls I made tp VIST.

Dave, the only thing I did, was remove the batteries and wiped the terminals and reinstalled them. I got the unit in October 07 at the VA WRBC and also on their board of directors. I never touched the battery pack till yesterday....anyway it is working and filled up my Rx Meds for next week.

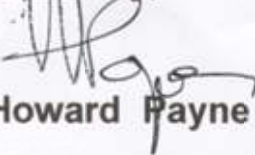

I always have been of the opinion that ScripTalk is great however, experiencing it not functioning when I was ready to refill my weekly Rx Meds, I fully realized the True Value of ScripTalk.

I tell every disabled, blind and senior I come in contact with at meetings about ScripTalk. I am with blind, disabled and senior persons and if they are not Vets they have no real knowledge of available aids such as ScripTalk.

I "live" the importance of ScripTalk and it should be Available to every visually impaired/blind, disabled and senior person. When I show ScriptTalk to RNs, Doctors and blind persons they are amazed. You mentioned a test in Walgreens, this use to be one of my accounts. Also had many accounts in the management of Senior Apartments, Assisted Living and SNFS.

It was a pleasure speaking with you. I always mention ScripTalk with all my contacts including accessibility contacts. I am very active in safe mobility for the blind and disabled. After five months Training at the VA Blind Center I observe a need and I am gaining partnerships with organizations. You have great support in the VA VIST.

Sincerely,

Howard Payne
